

Every screen. Every speaker. One plan.

Activate any channel — or orchestrate them all — with BoostLayer wiring them together underneath. One impression becomes a measurable, re-engaged audience across devices, reported in a single dashboard you can put in front of a client.

POWERED BY
CONNECT + ADLINK

Every tactic above is planned, proposed and placed in **Connect**. **AdLink** turns the results into proof — custom dashboards of spend, impressions, reach, store visits and conversions you can put in front of a client.

BoostLayer re-engages the audience you already earned.

Most audio and CTV companion banners fire while the screen is locked — served, but never seen. BoostLayer re-serves the message the moment the listener picks the device back up, one-to-one with every impression, and measures the people who returned or converted even if they never clicked.
