

Your best post, running across the open web.

SocialExtend turns approved posts from Instagram, TikTok, Facebook, X, Pinterest and LinkedIn into display ads that keep the look and feel of the original — social content, with programmatic reach and targeting behind it.

CONTENT PEOPLE ALREADY CHOSE TO LOOK AT

Familiar by design

True-to-life recreations of your real posts — the same layout and cues people know from the feed.

No production build

The post you already published becomes the ad. No shoot, no new creative, no production line item.

Social proof travels

The engagement, the comments and the credibility that live on the post come with it.

HOW IT WORKS — POST TO PLACEMENT, NO PRODUCTION CYCLE

01 Choose the post

Start from the content that already earned attention in the feed.

02 Convert it

It becomes a standard ad tag with working exits and engagement tracking.

03 Activate

It runs programmatically across the open web, targeted like any other line.

WHERE YOUR AUDIENCE ALREADY SCROLLS

Creative shown is illustrative of the format and does not represent a client relationship. Available platforms, formats, interactions, engagement tracking and reporting vary by source content, publisher, technology partner, campaign objective and advertiser eligibility. Approved social content and applicable platform permissions are required.

ALSO POWERS CTV PAUSE ADS

The same approved post can run as a **CTV pause ad** — the unit that appears when a viewer pauses the show — with a scannable code carrying them straight to the offer. **AdLink** reports it alongside the rest of the plan.

Put your social content to work.

Send us the posts that performed — we'll get them running where the plan already is.
